Evidence Method Subject Mini Book

WHAT THIS FILE IS

- A mini-book for readers who need the method before the claim: source hierarchy, evidence badges, claim classification, correction path, speculation boundary, and trust-center route.

WHY THIS MATTERS

- This PDF is controlled by a subject intelligence profile, so its main players, proof routes, boundaries, related books, and actions stay specific to the subject.
- When the profile or live-intel data changes, the PDF rebuilds with the new information during the normal site build.

WHAT THE RECORD CAN SUPPORT

- Methodology, evidence classification, source hierarchy, correction route, and claim-boundary language.
- This subject profile exists to stop unsupported claims from becoming reader-facing certainties.

SPECULATION BOUNDARY

- Speculation must be labelled, bounded, and routed to the strongest available source trail.
- A weak source can start a question, but it cannot carry a strong claim.
